

Uday Kiran

Javascript Engineer

I'm excited about web development, peer to peer web and decentralization! I am very much into building clean UI for the end user & finding the best ways possible to engage customers. I'm also an open source & free software enthusiast.

Work Experience

Fullstack Developer

Oyez.fr (January 2018 – December 2018)

- Revamped an e-commerce website's frontend built on top of Redux & React with a completely new and cleaner UI using React & Apollo GraphQL.
- Reviewed and contributed to internal utility & components libraries which are used across multiple services.
- Refactor a complex Menu component into modular, composable component.
- Solved bugs related to RWD, Performance & UX compliance.
- Code an orchestration system to migrate data from previous architecture to new architecture using NodeJS (Express, Koa), MongoDB (With Mongoose), Google Pubsub & Elasticsearch.

Fullstack Developer

fruitstone (December 2017)

- Implement search filters & other frontend functionality for an e-commerce website using ReactJS, Redux and React Router.
- Implemented API endpoints on a backend using ExpressJS & MySQL (sequelize).

Skills

- Web Technologies (like HTML5, CSS3, Sass, PostCSS, Pug/Jade)
- Javascript (ES6+), Typescript
- Frontend frameworks (ReactJS)
- Libraries (CSS-in-JS, Redux, Jest)
- Backend frameworks & libraries (Koa, Express, GraphQL, Apollo)
- Build tools (Gulp, Webpack, Parcel)
- Databases (SQLite, MongoDB, Elasticsearch)

Projects

Monoprix

<https://www.monoprix.fr/courses-en-ligne>

A popular e-commerce website in France

Modern Pomodoro

<https://gitlab.com/buoyantair/modern-pomodoro>

A vanilla javascript based pomodoro app that helps me manage my time

Graphblog

<https://gitlab.com/buoyantair/graphblog>

A simple blog system with markdown support, I learnt a lot about graphql while building this
